

Financing for Municipalities and Nonprofits

The Kentucky Brownfield Program can provide Targeted Brownfield Assessments to municipalities, quasi-governmental agencies and nonprofit agencies free of charge. A candidate site should have redevelopment potential and suffer from the stigma of potential environmental liability. A limited number of these assessments are performed each year, so they are considered on a first-come, first-served basis. Once a property has been assessed, cleanup can commence if deemed necessary. There are several funding sources available to those wishing to redevelop brownfield properties.

Grants

Grants for cleanup are available from a variety of sources. Eligibility depends on the type of project and end use of the property. Many of the brownfield grants available can be found on the U.S. EPA Web site at:

<http://www.epa.gov/brownfields/pilots/htm>

Loans

Revolving loan funds are another resource option. An entity can apply for an EPA grant to establish its own revolving loan fund for brownfield projects. Check the EPA Web site for more information.

The Kentucky Infrastructure Authority administers the Clean Water State Revolving Loan Fund. To be eligible for these funds, the money must be used to address brownfields that have a current or potential impact on surface or ground water.

Other Resources

Other resources may be available for the public sector, the private sector and individual brownfield redevelopers dependent on the planned end use of the property. Contact the brownfield program staff to determine if your project may be eligible for other resources.
